Summary

Senior Computer Science student with an interest in AI, Mathematics and Data Science. Project experience includes an agential AI application, systems-level and application-level projects. Seeking a full-time software engineering position starting January 2027.

Education

Bachelor of Science in Computer Science Graduation: December 2026
Arizona State University Tempe, AZ

- **Term GPA:** 3.71 **Cumulative GPA:** 3.91
- **Relevant Coursework:** CSE 471: Introduction to AI, CSE 478: Data Visualization, CSE 575: Statistical Machine Learning
- **Activities:** Active member of ASU Salsa Club

Technical Skills and Certifications

Programming:	Python, C, C++, C#, Java, R, SQL, HTML + CSS, GDScript
Design and Modelling tools:	PowerBI, MATLAB, Microsoft Office
Certifications:	SQL for Data Science — Coursera AI Fundamentals - Google

Professional Experience

- Teaching Assistant and Grader: Arizona State University** Aug. 2025 – Present
- Supported over 200 students across 2–3 course sections each semester by explaining key mathematical and computer science concepts and grading quizzes, homework, and exams.
- Retail Associate: Best Buy** November 2023 – December 2024
- Ranked second in the store for revenue generated by delivering excellent customer service, processing customer transactions and trade-ins, assisting with inventory management, and collaborating with Geek Squad to resolve technical issues

Projects

- Artificial Intelligence Agents** February - May 2026
- Built AI agents for a Pacman environment, implementing classical search (DFS, BFS, A*), adversarial game-tree algorithms (Minimax, Alpha-Beta Pruning), and reinforcement learning (Q-learning, Value Iteration) to solve pathfinding and decision-making problems
- Used Car Prices Analysis** April 2026
- Created an EDA report on a Kaggle dataset of used car listings across 50+ U.S. states, using data cleaning, outlier treatment, and interactive visualizations to reveal price trends and a 2019-2020 spike.
- Library Game Jam: Arizona State University** March 2026
- Won the Artistic Award at a week-long game jam by developing a 3D game in Godot as part of a three-person team.
- Custom Compiler (Class Project)** November 2025
- Developed a custom compiler in C++ by implementing lexical analysis, recursive-descent parsing, semantic analysis and error handling for a custom programming language.
- Engineering Projects in Community Service (EPICS) — Team Lead** January - May 2025
- Designed and presented a prototype for a stakeholder as part of an 8-person team, programming interactive buttons and integrating service dogs to support English language learning in Title I schools.
